

IN THE SPECIFICATION

1. Please replace the paragraph beginning on page 6, line 1 with the following replacement paragraph:

The first embodiment of the present invention includes a radio access network (RAN) and remote units, such as mobile node (MN) or mobile station (MS) 330 and 102. Those skilled in the art will recognize that FIG. 1 does not depict all of the network equipment necessary for system 300 to operate but only those logical entities particularly relevant to the description of embodiments of the present invention. For example, the RAN comprises well-known entities such as base stations and packet control functions (BS/PCFs 310 and 311) and packet data serving nodes (PDSNs 305 and 306), which interface with internet protocol (IP) network 301.
